

Modular Hygiene Station Star Clean IV

STAR CLEAN IV Type 23881 All in One

Special bristles (sole side cleaning optional)

Controlled personnel hygiene

- Obligatory hand and sole cleaning including disinfection
 - Many variants of the Star Clean IV modular hygiene station can be precisely customised to operational requirements and directly integrated into the systematic personnel hygiene process chain
 - Faster lead time due to simultaneous cleaning and disinfection of hands and soles. Entry capacity: max. 20 pers. (depends on version)
 - The system can be installed as a platform or built-in variant
 - Dry variants with dirt collection drawer, preferably used in the baking industry, are also available
 - Due to the mandatory process flow maximum hygiene is achieved before entering sensitive production areas
 - The modular design enables customised solutions
- The open hygienic design allows fast and efficient cleaning of all components

Option

- Module for sideways sole cleaning up to a height of approx. 4.5 cm
- Special feature for bakery industry: UVC-disinfection module for dry brush cleaning

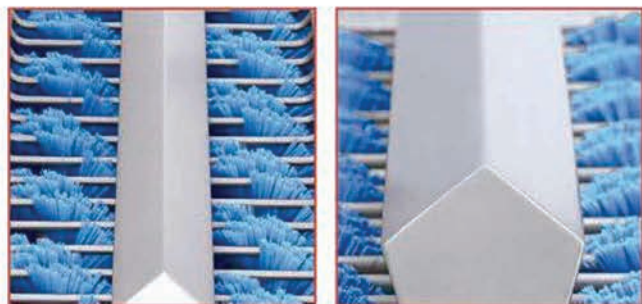

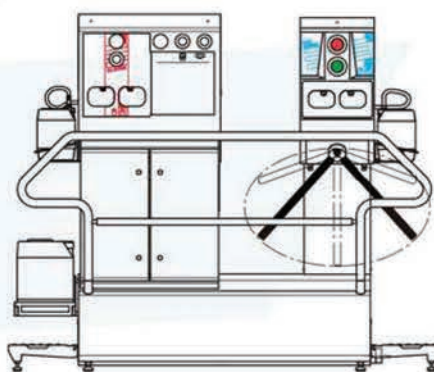

STAR CLEAN IV All in One

Safe personnel hygiene at production entry: from hand cleaning, to drying, to hand disinfection with simultaneous walking through sole cleaning, controlled by a motor-driven turnstile.

Technical data

Type	STAR CLEAN IV Type 23882 All in One
Power supply	400V 3/N/PE
Power consumption	0.8-2.4 kW
Main frequency	50-60 Hz
Control voltage	24V DC
Protection class	IP65
Room temperature	Min. +4°C, max. +40°C
Water supply	½" max. 65°C
Drain	R2 1/2"

Technical data may be subject to changes.

Helical bristles increases the effectiveness of mechanical cleaning. Excellent removal of dirt is also guaranteed. Easy removal of brushes ensures thorough cleaning of machine and brushes.

The Pentagon step guide in combination with the optimized tread ensure optimal sole cleaning and better machine hygiene.
